Lassen Fire Safe Council
Lassen County, California

RE: Letter of Support – Dyer Mountain WUI Fuels Treatment Project, Phase II

Dear Lassen Fire Safe Council:

On behalf of the Clear Creek Community Services District (CCCSD), we are pleased to express our support for the Lassen Fire Safe Council's grant application for Phase II of the Dyer Mountain Wildland-Urban Interface (WUI) Fuels Treatment Project.

Clear Creek is a rural, forested community where wildfire prevention and preparedness are essential to protecting residents, homes, public infrastructure, and natural resources. As a community services district responsible for providing water services and supporting volunteer fire protection, we recognize the importance of proactive wildfire risk reduction efforts.

Projects designed to reduce hazardous vegetation, improve defensible space, and lessen the potential intensity and spread of wildfires are vital to the long-term safety and resilience of communities throughout Lassen County.

We commend the Lassen Fire Safe Council for its continued efforts to secure funding and coordinate wildfire prevention projects that benefit our region. We believe the proposed Dyer Mountain WUI Fuels Treatment Project, Phase II, represents an important investment in regional wildfire preparedness and community protection.

The Clear Creek Community Services District supports the Lassen Fire Safe Council's efforts to obtain grant funding for this project and encourages favorable consideration of its application.

This letter expresses the District's support for the proposed project and does not constitute a commitment of District funding, personnel, equipment, or other resources.

Sincerely,

Jasmine Conner
Board Chair
Clear Creek Community Services District

On behalf of the Board of Directors
