

## CLEAR CREEK COMMUNITY SERVICES DISTRICT STAFF REPORT

TO: The Board of Directors  
FROM: Nicolette Moroney, General Manager  
TOPIC: COVID - 19

DATE: March 29, 2020

---

### **SUMMARY:**

Not much has changed the way we do business, there is very little face to face contact as most customers send in their payment or use the drop boxes at the district office and firehouse. If a customer does have a question or concern they usually call or email.

Currently, there is no evidence that the COVID-19 virus survives the disinfection process for drinking water. The public can continue to use and drink water from their tap as usual. Visit the U.S. EPA's webpage [www.epa.gov/coronavirus/coronavirus-and-drinking-water-and-wastewater](http://www.epa.gov/coronavirus/coronavirus-and-drinking-water-and-wastewater) for up to date information. According to the World Health Organization, [www.who.int/publications-detail/water-sanitation-hygiene-and-waste-management-for-covid-19](http://www.who.int/publications-detail/water-sanitation-hygiene-and-waste-management-for-covid-19) the "presence of the COVID-19 virus has not been detected in drinking water supplies and based on current evidence the risk to water supplies is low."

JD is prioritizing his responsibilities to ensure essential functions are addressed; low priority tasks will need to be postponed until further notice. He will continue to provide ongoing water quality monitoring and reporting in accordance with laws, regulations and permit requirements.

Chief Hunter has instructed all volunteers on the importance of using PPE (personal protective equipment) during this time. He has also reinforced the need of community social distancing.

We do have a coronavirus link on our website and a notice has been posted on steps to prevent the spread of all respiratory viruses.

We have not yet canceled the public hearing on the water rate increase, waiting to see where this goes.
